INSIGHT

- This is an ocean clean-up report for USA from 2015 - 2019.
- The year 2017 had the highest record in everything (Total items, total pounds, total miles, total participants & bags used)
- I noticed that the year 2019, despite having lower participants compared to other years, a lot of miles were covered, but had less of trashed items and pounds than those years.
- This means there has been significant improvement in trash disposal by the users of the ocean surrounding and something is making that possible.
- With more data collection, it can be
